Giovanni Mota

Software Developer

Campinas, SP, Brazil | +55 19 98354-4407 | giovanni.mota01@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Software Developer with 5+ years of experience building and evolving web and mobile applications in corporate environments and custom software projects. Experience with React, Next.js, React Native and TypeScript, plus backend development knowledge using C#, .NET, Java, Spring Boot, REST APIs and relational databases.

Experience in code architecture and organization, service integration, system refactoring, code review and technical mentoring. Hands-on knowledge of data persistence with PostgreSQL and asynchronous messaging. Quality-oriented profile focused on software maintainability, cross-functional collaboration and translating business requirements into technical solutions.

TECHNICAL SKILLS

Front-end	React.js, Next.js, TypeScript, JavaScript, React Hooks, Context API, Zustand, Redux, HTML, CSS, styled-components, Tailwind CSS, accessibility, responsive design and third-party library integration
Mobile	React Native, Swift/SwiftUI, library and SDK integration, offline-first, data synchronization, app publishing and versioning on the App Store and Google Play
Back-end and data	Node.js, Express.js, Java, Spring Boot, C#, .NET, REST APIs, authentication, SQL and relational databases
Quality, cloud and delivery	Amazon Cognito, AWS fundamentals, Docker, Microsoft Azure, Azure DevOps, Vercel, Git, Gitflow, code review, Scrum, Jest and React Testing Library

PROFESSIONAL EXPERIENCE

Softable | Senior Front-end Developer | Remote — **Jun 2022 – Present**

- Developed and evolved web and mobile applications with Next.js, React.js, React Native and TypeScript for corporate clients, including Lupo, Saint-Gobain, Cargill and Votorantim.
- Built numerous screens and flows from scratch, turning requirements and Figma prototypes into responsive, accessible and visually consistent interfaces.
- Served as the internal go-to person for questions on screen implementation, component organization, layout and technical feasibility of UI solutions.
- Refactored legacy systems, investigated performance issues and implemented new features with a focus on readability and maintainability.
- Mentored interns and junior and mid-level developers, conducted code reviews and shared technical standards and decisions with the team.
- Evaluated and integrated third-party libraries and SDKs in web and mobile applications, considering compatibility, maintenance and product requirements.
- Contributed to some back-end tasks, including reading and performing initial maintenance of C# code and REST integrations.

Technologies: Next.js, React.js, React Native, TypeScript, JavaScript, Figma, Context API, Zustand, Axios, styled-components, Git and Gitflow.

Kumulus | Front-end Developer | Hybrid — **Feb 2021 – Jun 2022**

- Developed web applications with Next.js, React.js and TypeScript for custom software projects, following internal standards and client requirements.
- Worked directly with stakeholders and cross-functional teams to clarify requirements, align on solutions and support product deliveries.
- Evolved legacy systems through new features, code restructuring and usability improvements.
- Took part in Scrum ceremonies and delivery routines using Git, Docker, Microsoft Azure and Azure DevOps.

EDUCATION AND LANGUAGES

Fatec Campinas | Associate Degree in Systems Analysis and Development
2019 – 2022

Colégio Técnico Bento Quirino | Technical Diploma in Mechatronics
2015 – 2017

LANGUAGES

Portuguese: Native

English: Advanced in reading, writing and speaking
